

## **FTI Continues Growth Expansion in China**

**Oakville, ON, CANADA – June 27<sup>th</sup> 2008** – Forming Technologies Inc. (FTI), the world’s leading developer of software for the design, simulation, and costing of sheet metal components, and DNE, currently the largest Dassault Systemes Business Partner and the most experienced solutions provider in China, announce an agreement designed to enable DNE to be a Preferred partner of FTI software and further strengthening its local support in China.

DNE boasts a team of more than 200 employees (in 9 offices) with unparalleled knowledge and expertise in all engineering fields such as; structural engineering, durability, multi-body dynamics, vibration mechanics, fluid dynamics, metal forging, casting, acoustic, and more.

“DNE and FTI have similar core values and corporate philosophies and an underlying desire to bring value to the bottom line for our customers,” states Michael Gallagher, VP Sales and Marketing of FTI. “This agreement is consistent with our growth strategy of offering our customers localized sales and support. DNE has strong leadership and a strong desire to solve their client’s issues and I look forward to years of building a successful partnership together. DNE will work with our new sales and support team from FTI Asia.”

“FTI’s Catia based solutions are a natural addition to our current portfolio,” states Linda Lee, President of DNE. “Our focus has been to work with our customers to deliver additional solutions within the Catia environment that will improve the design process. FTI offers a diverse range of solutions from formability analysis to optimization, ease of use and speed to the associativeness within Catia, which all makes a very powerful and compelling solution for our customers. Utilizing the FTI suite of solutions will allow our firm to offer new options to our clients that will reduce their material and labour costs, enhance their production processes, and bring new products to market more quickly.”

## **About Forming Technologies**

Forming Technologies Incorporated (FTI) is the world's leading developer of computer aided engineering software for design, and simulation of sheet metal components. For the past 19 years, FTI has provided OEMs and suppliers in the automotive, aerospace, and appliance industries with innovative software and training solutions designed to reduce development time and material costs. FTI has trained over 12,000 engineers in Formability and Die Design and is considered the Best in Class around the world for their industry training programs. FTI and its global network of business partners provide sales and technical support to customers in more than 35 countries.
